DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 03 March 2004 have been fully considered but they are not persuasive. Applicant's argument that the Katta reference does not disclose inserting dummy information into the actual data samples is not persuasive because this limitation is not present in the current claims. Katta does disclose that dummy patterns are inserted into the compressed video data (Abstract, lines 2-4).
2. Applicant's argument that the Katta reference does not disclose determining a dynamic range of each sample of digital content, where the dynamic range is defined by a most significant data bit of the data sample is not persuasive because with the dynamic range of Applicant's invention was defined by Mr. Lipsitz, in the interview held 13 November 2003, as being significant with respect to value rather than bit position and Katta discloses scrambling occurs so that only the relevant data is scrambled (Col. 10, line 53 – Col. 12, line 11).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an

international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1, 3-5, 7-12, 14-16, 18-21, 23-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Katta, U.S. Patent No. 5,706,346. Referring to claims 1, 5, 7, 8, 12, 16, 18, 19, 23-26, Katta discloses scrambling apparatus wherein video data is analyzed before it is scrambled to determine if there is dummy data inserted therein. Upon determination of dummy data in the video data a switch is used to control the scrambling so that only the relevant data is scrambled (Col. 10, line 53 – Col. 12, line 11), which meets the limitation of determining a dynamic range of bits defined by a most significant non-zero data bit and scrambling the selected number of LSBs. Once scrambled the data is partially but not completely discernible (Col. 2, line 13), which meets the limitation of the scrambled samples being degraded but still recognizable.

Referring to claims 3, 14, Katta discloses that the video data may be scrambled by frame units (Col. 3, lines 29-30).

Referring to claims 4, 15, Katta discloses that the scrambling key can be pseudo random (Col. 1, lines 24-30).

Referring to claims 9-11, 20, 21 Katta discloses that the scrambling key can be included (embedded) in the scrambled sample (Col. 6, lines 51-59).

Allowable Subject Matter

5. Claim 22 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:
The prior art does not disclose the scrambling of the scrambling key after the sample has been descrambled.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
